

Method One: Retain a sample of the rinsate solution. Apply sample to sensitive plants such as an ornamental flower, tomato, or cotton. Observe treated plant for 48 hours or longer, and do not use tank during the test period. If plant damage occurs, reclean the tank until the rinsate is pesticide free.

Method Two: Retain a sample of rinsate solution and submit to a qualified testing laboratory for analysis. Operators of multiple chemical use equipment and growers of high value or sensitive crops may wish to use all available testing methods to prevent accidental contamination and crop damage.

Warning:

Contains sodium carbonate, CAS Registry No. 497-19-8. Causes eye and skin irritation. Avoid contact with eyes, skin and clothing. Wash thoroughly after handling. In case of contact, immediately flush eyes and skin with plenty of water for at least 15 minutes. Call a physician. In case of spillage, sweep, scoop or vacuum and remove. Flush spill area with water. For additional information, see Material Safety Data Sheet (MSDS). www.agricrop.com.au

CONDITIONS OF SALE

The use of Neutralize being beyond the control of the manufacturer, no warranty expressed or implied is given by Agricrop Pty Ltd regarding its suitability, fitness or efficiency for any purpose for which it is used by the buyer, whether in accordance with the directions or not and Agricrop Pty Ltd accepts no responsibility for any consequences whatsoever resulting from the use of this product.

Neutralize™

Water soluble powder

Tank and Equipment Cleaner

- Non-corrosive
- Safe for Agricultural, Pest Control and Turf use
- Helps Prevent cross-contamination
- DuPont approved

Application rate: 1kg per 1000 L water
(see directions for use on next panel)

CONTENTS

DIRECTIONS FOR USE

Fill spray tank to half capacity with water. Engage agitation. Slowly add 1KG Neutralize for every 1000 litres of water added to the tank. Agitate throughout tank for approximately 15 minutes. Rinse all internal areas of the tank, then empty the tank by the boom, and other outlets to ensure all are clean. Close valves and refill tank with clean water. Empty water through all outlets and boom to ensure no residue remains. Test the second rinse solution (See Method #1 or #2 under testing) to ensure no pesticide residue remains. If pesticide residue remains in the solution, repeat the cleaning process. Exact rates should be determined by the user as rates will vary depending on the type, size, and condition of the spray tank.

BACKPACK USE

Add 10g of Neutralize to a 10 ltr backpack. Fill sprayer with water and shake. Empty the rinsate through the hand wand. Be sure all pesticide is removed prior to reusing.

SPECIAL INSTRUCTIONS

Rubber parts, such as hoses, pump packing, etc. may retain pesticide residues. Exterior areas of spray tanks may be cleaned with Neutralize. Neutralize can prevent corrosion and dissolution of metals. All rinsate must be properly handled since it may contain pesticides residue.

RINSATE TESTING

Certain pesticides, including but not limited to 2,4-Ds and Sulfonylureas, are difficult to remove from the tank. Pesticides are extremely active at very low rates and must be completely removed from the tank to prevent crop damage. Do not apply Neutralize or rinsate directly to crops. Rinsate levels may be tested by several different methods; see next panel for suggestions.
